

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

IN RE APPLICANT	: James Faulhaber
INVENTION	: IMPROVED SPINNER BAR
SERIAL NUMBER	: 10/803,591
FILING DATE	: March 17, 2004
EXAMINER	: Frankie L. Stinson
GROUP ART UNIT	: 1746
OUR FILE NO.	: 2620.001

DECLARATION UNDER 37 C.F.R. Section 1.132

I, James Faulhaber, declare and say:

1. That I am the inventor of the above identified patent application.

2. That the included video:
contains a video illustrating the Improved Spinner Bar made possible by the disclosures of the instant invention. In particular, the video illustrates a direct comparison of a typical spinner bar to the Improved Spinner Bar of the instant invention.

3. That a CD including the relevant video is included herewith for inclusion in the file wrapper of the instant application.

5. That I have reviewed the Office action dated November 24,

Express Mail No. EV 842341135 US

2006 in which the Examiner has applied U.S. patent 7,079,042, to Reim, under 35 USC 102(e) against claims 1-10 and 12-17.

6. That I have further reviewed the Office action dated June 29, 2007 in which the Examiner has applied Japan 8-84964 in view of Anderburg U.S. patent 4,095,746, under 35 USC 103(a) against claim 1 and 10.

7. That, in my opinion, the patents to Japan alone, or in combination with the patent to Anderburg, do not teach my invention, since neither Japan nor Anderburg disclose a rotational Spinner bar having a first array of nozzles fixedly inclined at a first compound angle with respect to the surface plane to direct a cleaning spray at a surface on a rearward side of a vertical axis extending through said spray bar **to provide the exclusive motive force to cause rotation of said spray bar. The first array of outer nozzles are also angled to spray outwardly with respect to the axis of rotation to spray beyond the distal end of the spinner bar during rotation** and a second array of nozzles **fixedly** inclined at a second **substantially vertical angle** with respect to the ground plane to direct cleaning spray at the surface.

8. That the undersigned declares further that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or

imprisonment, or both under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patents issuing thereon;

Further declarant sayeth not.

X 
James Faulhaber
